6. Update on Covid19 and Flu issues ~~SLU Plan Jar~~ (see slides) ~~DRebman~~ noted that there have been increases of COVID, RSV, and the flu in the region and at SLU we have seen similar patterns. Cases and hospitalizations have increased over 25% in the last 2 weeks. We also need to recognize that what we see in terms of cases is an underestimate of the true numbers as many individuals are self-reporting. Less than 5% of the cases reported to SLU have been tied to classroom or lab clusters. Faculty should anticipate a harsh flu season RSV & COVID19 as we return to campus next semester. SLU will continue to create policies in line with data and health department mandates.

7. Old Business

- a. Faculty Manual Amendment (see attached) Faculty reviewed the amendments and were notified that during the January meeting there will be time for additional discussion and voting on these amendments will occur during the February meeting.
